PAGES 2 & 3

Headline: **Behavioral Wellness and Recovery**
Generic: ADDICTION TREATMENT AND REHABILITATION

Intro graph: *Behavioral Wellness and Recovery provides exceptional programs and services for drug and alcohol addiction treatment and rehabilitation.*

Subhead: *Client-Centered Care*
Body: At Behavioral Wellness and Recovery, we are helping clients renew their hope as they renew their lives.

Everything we do for our clients is focused on their unique, individual needs, wants, and desires in life. With Behavioral Wellness and Recovery, clients come first; we treat clients using a *whole mind, body, spirit approach* to help ensure their success and long-term recovery.

Based on ongoing clinical studies, we center our programs and services on proven, traditional approaches and disciplines for treating addictive disorders as well as evidence-based medical models for achieving optimal outcomes.

Subhead: *The Heart of Wellness and Recovery*
Body: Unlike other addiction treatment programs, Behavioral Wellness and Recovery is *not* about a single episode of care followed by some aftercare plan. We believe treatment of addictive disorders is active, dynamic, and ongoing. We also believe treatment must be transitional and transformational to be enduring.

By constantly and consistently addressing the challenges of addictive thinking and behaviors and by transforming them into healthy thinking and behaviors, Behavioral Wellness and Recovery helps clients achieve *behavioral wellness and recovery*. Clients, in their wellness, get their health and happiness, confidence and contentment, as well as a feeling of serenity and security in their new life.

Sidebar: BWR offers Partial Hospitalization Programs (PHP) and Intensive Outpatient Services (IOP) while detox services are offered through our associate providers. We also offer living facilities for our clients with special accommodations and superb hospitality.

During their treatment and recovery, we at BWR believe it is exceedingly important for our clients, to experience the warmth, comfort, and care of home while away from home.

Subhead: *Christian Program*

Body: Behavioral Wellness and Recovery offers both traditional 12-Step Treatment as well as our Christian Program.

Clients have the benefit of participating in either program or both for a customized offering. Our Christian Program offers an alternative program for clients, based on their faith and their beliefs, who desire a stronger, deeper relationship with God.

Subhead: *At the Right Place at the Right Time*

Body: Providing a complete, comprehensive approach to treatment for addictive disorders, the Behavioral Wellness and Recovery Continuum of Care addresses individual patient needs.

Our diverse team of specialists works to understand the client's true cause of addiction along the Continuum of Care. Treatment programs are designed for the client involving medical and non-medical practices to heal the body, develop the mind, and renew the spirit.

The BWR Care Continuum ensures the right drug and alcohol addiction treatment programs are delivered at the right time for ensuring the client is appropriately treated, properly educated, and well prepared for long-term sobriety and recovery. Research shows that the longer the client's length of stay, the greater likelihood of achieving optimal, long-term results.

The BWR Continuum of Care includes:

- Long-Term Treatment and Recovery
- Individually Designed Treatment Programs
- Individual and Group Clinical Programs
- Client Transitional Program
- Intensive Outpatient Support
- Structured Family Recovery
- Spiritual Connection to Greater Power
- Access to Our Christian Program
- Use of Current and New Technologies
- Other Client Programs and Services

Quote: We developed Behavioral Wellness and Recovery programs and services as we would want for our own family members, friends, and loved ones.

Subhead: *Our Beliefs, Our Principles, Our Promises*

Body: Behavioral Wellness and Recovery beliefs and principles of operation make us unique in our commitment to others. Contained within our principles and beliefs are the promises our clients expect for health and healing, and power and freedom, over their addictive disorder.

Subhead: *We believe in:*

- The whole mind, body, spirit approach to addiction treatment
- The utilization of an evidence-based medical model
- The 12-step philosophy and approach to recovery pathways
- Alternate forms of treatment in nutrition, activity, exercise, and meditation
- Long-term recovery with strong accountability and guidance
- Transitional and transformational care in a continuum of care
- Integrated family approach to addiction treatment
- The healing power of God, God's Word, and prayer
- Gender-specific addiction treatment for men and for women

Finally, we believe in our clients, that they can achieve a healthy, productive life powerful and free.
